

# Cottonwood Heights

## Weekly Update for June 11-17, 2017

### City Manager

1. Staff enjoyed a fun and filling lunch on the west patio Wed. afternoon. Chief Russo and Deputy Chief Brenneman cooked hamburgers, Heather, Ann, Shelly and others prepared the other dishes, Public Works set up tables and chairs. Thanks to everyone for contributing to the great meal and time we were able to spend together.

### Administrative Services

1. Play practice for Annie has moved to the Butler Middle School.
2. Ann and the volunteers in charge of Butlerville Days are in high gear as the holiday approaches.
3. Coordination underway with contractors to get the internet installed at Mt. View Park to get the security cameras working.

### Police

1. Police attended the Caviler block party 300-400 people in attendance and K-9 demo by CHPD
2. The PD has started the Fireworks patrol this week for the interface area and parks.
3. Officers have started the yearly motorcycle patrol.

### Community and Economic Development

1. Our department hosted an Unconscious Bias Business Boot Camp on Thursday, June 15.
2. Carmine's Pizzeria opened for business at 2477 E Fort Union Blvd.

### Engineering

1. Developing plan to deal with the ground water discharging into the curb and gutter at Siesta Drive & 1360 East. Solution is to install 2-inch pressurized pipe and discharge into nearby water feature.
2. Working with UDOT and contractor to help accommodate them making a decision on the location of UDOT water service and how it affects our PW site.

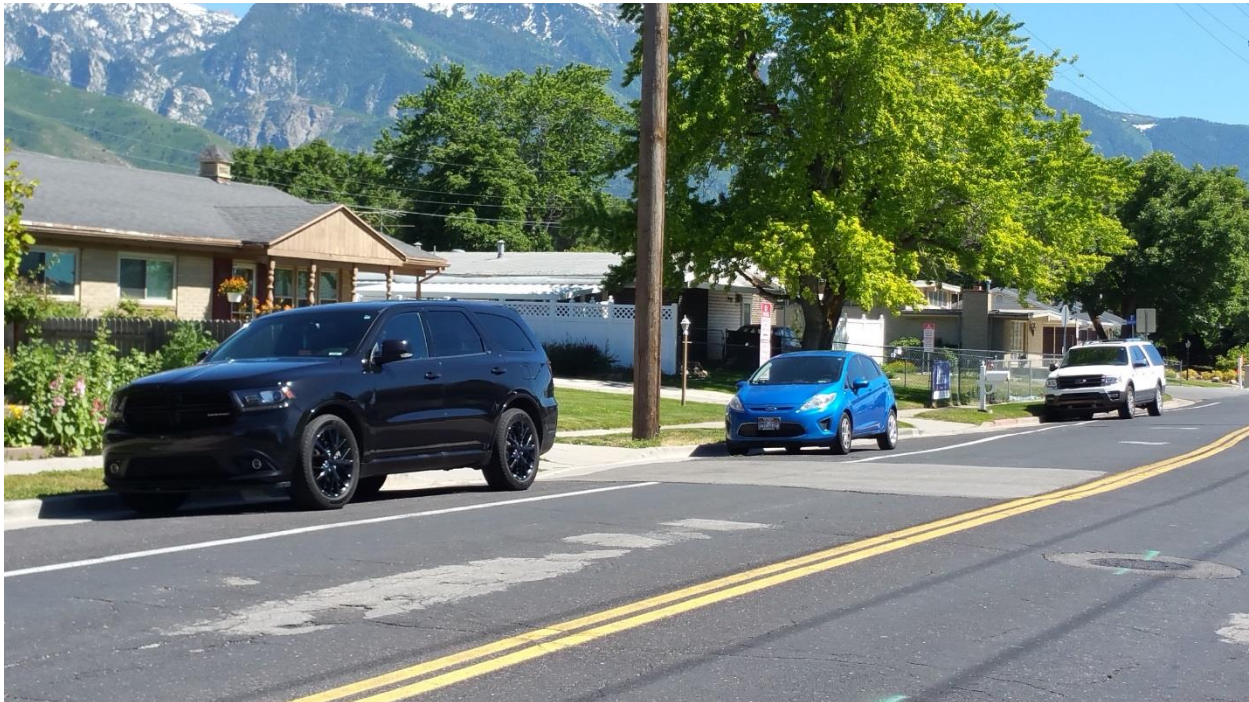

### Safety Moment – Chemical Safety

We work around chemicals every day. Soaps, cleaning supplies, paints, deodorizers, etc. They are everywhere we turn. As part of our building safety we are required to maintain Material Safety Data Sheets to document what the chemical is, potential hazards (health, fire, reactivity and environmental) and how to safely use the product. Phill will be compiling the data and books will be placed in both sides

of the building in case someone has a negative reaction to a chemical. Please help Phill by identifying the chemicals in your area and obtaining the MSDS sheets from the supplier or manufacture.

## PHOTOS

*Figure 1- The No Parking Signs on 2700 East continue to challenge some citizens looking to beat the heat at the Rec Center pool*

*Figure 2- The new 1-ton dual cab truck has arrived and put into service*

*Figure 3- The salt spreader and blade are from the same manufacture as the other trucks to simplify repairs and parts management*

Figure 4- The blade has extendable wings that can cup the snow which speeds up plowing in cul-de-sacs and parking lots

Figure 5- We caught the planning dept. collaborating at the collaboration table

*Figure 6- Masonry and site work continue at the UDOT yard*

*Figure 7- Site grading and compaction of the sub-rough material is finished at the city public works yard*

*Figure 8- The storm water detention basin is nearing completion at the public works yard*

*Figure 9- The access road is looking cleaner every week*

*Figure 10- The sub-rough grading and compaction has been completed*

*Figure 11- The site looks much smoother and clean (looking northeast toward the access road)*

*Figure 12- City public works yard looking south from the access road*

*Figure 13- The UDOT shop is coming out of the ground*
